

Precision Pump Kits

PWS APK-1 SHOWN

Add a pump kit to your water distiller to deliver the distiller water to your kitchen sink. Pump Kits contain: 1 - water pump; 1 - Chrome Pantry Faucet; 25 ft of Feed Line and all the fittings required. You can also tie into this line and deliver the distilled water to your fridge, ice maker, humidifier or anywhere else in your home. (Extra Fittings required) Please note: When pumping to several locations we recommend the aid of an Accumator Tank; this will increase the life of the pump.
